Environmental Policy Statement

GTD Installations Limited is committed to minimising the impact of its activities on the environment and working towards all the environmental legislation that relates to the Company.

The key points to achieve this are:

- **Reducing waste**
by evaluating operations and ensuring they are as efficient as possible, including water and buying vegan products in bulk when possible. Avoidance of purchasing products with excessive plastic packaging.
- **Reducing toxic emissions**
through the reduction of unnecessary journeys, efficient scheduling, regular maintenance and the selection of our vehicles and the using 100% green renewable electricity in our office and tools.
- **Actively promote recycling**
both internally and amongst our customers and suppliers by the use of recycled printer paper, post-it notes, cloths, hand towels, paper towels, tissues, toilet roll. Use of recycling bins for waste, and recycling of packaging.
- **Actively promote the Clean Air Act 2018**
amongst our customers and staff and make aware of environmental impact of customer choices in materials and appliances. Source and promote a suppliers with a low carbon footprint to minimise the environmental impact of both production and distribution of purchases. Also educate customers in best practice in the use of their installation to keep pollution low.
- **Make use of and promote products**
that have low environmental impact in the office and on-site with staff, suppliers and customers. Such as cleaning products and detergents. Cleaning of van using low water solution and use of washing machine on Eco mode.

Signed
